Office Action Summary	Application No. 10/635,133	Applicant(s) KRUGER ET AL.	
	Examiner Stephen J. Kalafut	Art Unit 1745	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 1-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1 and 15 recite that each cell is received by one of the plurality of channels in the frame. However, the disclosed structure shows each cell being received by a pair of grooves, one at each lateral end of the cell. There is no antecedent for "said angle" in claim 18, or its parent claim 16. Should claim 18 depend from claim 17? It is noted that for the claims 16 through 20, the dependency of each is on a claim numbered two less, rather than on a claim numbered one less, as are claims 2-14. Claims 2-14 and 16-21 depend from claims 1 or 15 and would likewise be indefinite.

The disclosure is objected to because of the following informalities: Section 0016 refers to Figure 1, but the numerals referred to occur in any of Figures 1 through 3. In section 0020, line 6, the "cells" are numbered 32, but elsewhere as 34. In section 0023, the numeral 32 is used to indicate "extensions". The numeral 56 is used to indicate "guide channels" in section 0026 and "stops" in section 0027. Appropriate correction is required.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gill (US 1,526,208), Rifkin (US 1,547,447) and Eberle (US 5,001,024) disclose batteries in which electrode plates are held in place by grooves in the sides of a casing. Eberle (US 3,841,915), Gaide (US 3,944,436) and Miyagi *et al.* (US 6,190,797) disclose bus bars connecting adjacent cells, made by poring molten lead or by welding.

Art Unit: 1745

Claims 1-21 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action. The prior art cited above or by applicant does not disclose a battery comprising a frame that includes grooves, where each lateral end of each cell is received by one of said grooves, and bus bars each connect a set of terminals extending from each cell.
